SUMMARY

Software Engineer with 2 years of experience building scalable Java microservices, distributed systems, and full-stack web applications. Strengths in multithreading, high-volume data integration, and end-to-end product development. Top 5

EXPERIENCE

Accenture

Software Engineer

Hyderabad, India

May 2026 – Present

- Designing a scalable, concurrent Java integration service with dynamically configurable thread pools for high-volume data ingestion into Hexagon EAM and DB Pro, automating workflow execution and targeting an 80% reduction in QA cycle time.

Associate Software Engineer

Aug 2024 – May 2026

- Engineered complex PL/SQL stored procedures and triggers powering critical transactional workflows; optimized multi-table JOIN queries, cutting data-retrieval latency by ~40% on large-scale datasets.
- Built JavaScript (ExtJS) UI modules with dynamic field validations enforcing data-security and integrity compliance.

PROJECTS

ScaleWithMahi – Tech Interview Prep Platform | *Java, Spring Boot, PostgreSQL, Next JS, Firebase*

2026

- Engineered a full-stack educational platform (scalewithmahi.com) using a Java/Spring Boot REST API and PostgreSQL database to manage structured Data Structures, Algorithms, and System Design curriculums.
- Developed a scalable gamification engine that accurately tracks real-time user problem-solving streaks and daily activity to power a dynamic, GitHub-style consistency grid.
- Secured backend endpoints by integrating Firebase Authentication with Spring Security, utilizing stateless JWT validation to protect API routes and manage user sessions.
- Designed a highly responsive, dark-mode frontend using Next.js and Tailwind CSS, featuring seamless mobile navigation, interactive progress tracking, and a real-time feedback notification system.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, SQL

Backend: Spring Boot, REST APIs, Multithreading/Concurrency, PL/SQL, Microservices, System Design

Databases: PostgreSQL, MySQL, MongoDB

Caching & Messaging: Redis, Apache Kafka

DevOps & Cloud: Docker, Git, CI/CD (GitHub Actions), AWS (EC2/S3)

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST API Design, Distributed Systems

EDUCATION

Vishnu Institute of Technology

Bachelor of Technology in Computer Science

Bhimavaram, India

2020 – 2024

- CGPA: 9.1/10
- Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, OOP, Computer Networks

ACHIEVEMENTS

- LeetCode (Top 5%):** Solved 400+ problems, focused on Dynamic Programming & Graph Algorithms.
- Hackathon Lead (IGDC Partner):** Organized REIMAGINE, a Pan-India game-development hackathon, coordinating logistics for student developers nationwide.
